PROFESSIONAL SUMMARY

Pursuing Bachelor of Technology(B.Tech) in Computer Science Engineering (AI), seeking an internship opportunity, to apply my skills in programming, AI/ML . Eager to contribute to innovative projects and gain practical experience in a dynamic tech environment.

EDUCATION

Bachelor of Technology in CSE (AI) , Jain university - 2022-2026	94.8%(Pursuing)
Intermediate, Sree Chaitanya college - 2020-2022	96.5%
Army Public School ASC&C(CBSE) - 2020	90.8%

SKILLS

HARD SKILLS

- **Programming Languages:** Python, Java(OOPs), C
- **Data Structures and Algorithms**
- **Database:** MySQL(basics)
- **AI/ML Concepts:** AI in Python, Machine Leaning(Deep Learning)
- **Web Development:** HTML

SOFT SKILLS

- **Communication & Collaboration:** Developed strong communication through team projects, effectively sharing ideas and working towards common goals.
- **Critical Thinking & Problem Solving:** Applied analytical skills in academic projects to solve complex problems and optimize outcomes.
- **Adaptability & Time Management:** Managed coursework and projects effectively, quickly learning new concepts and adapting to changes.
- **Work Ethic & Accountability:** Demonstrated reliability by consistently meeting deadlines and delivering quality work.

INTERNSHIP

Software Development Intern
Tonbo Imaging India Private Ltd, Bengaluru
(June 2024 - July 2024)

- Gained hands-on experience with deep learning technologies, contributing to the development of electro-optics systems.
- Collaborated with internal and external teams to support the deployment of software solutions for scalable night vision systems.
- Worked on applications of deep learning in defence-related surveillance and targeting systems.

PROJECTS

AI Driven Automobiles(Car):

- Building a software which has self parking system, and recognizes obstacles while driving through radar senses .

Smart Energy Management Systems: Optimizing Power Distribution and Consumption with AI Deployment :

- Created an AI-based Smart Energy Management System to optimize power use with real-time monitoring and machine learning, improving efficiency and reducing costs.
